

GREYHOUND

Lolium Hybridum
Turf Ryegrass

Not satisfied with the results of the Turf-Type Annual Ryegrasses available?

Looking for the turf quality of top rated Perennial Ryegrasses, but frustrated with their inability to transition effectively?

Greyhound Hybrid Ryegrass was bred 'backward', starting with high end turf Perennial Ryegrass plants, and hybridizing them to incorporate the beneficial attributes of Annual Ryegrass. The result is a combination of the best attributes of both Perennial and Annual Ryegrass.

Quick germination, rapid tillering, dark green color, fine leaf texture, and easy transitioning provide the discriminating turf manager with an ideal alternative to today's persistent Perennial Ryegrass.
